## **Beware Of Synthetic Gemstones**

After willing to spend a good amount on purchase of an Astro gemstone the last thing you would want is that it should be a synthetic one.

A high quality gemstone will fetch a high value hence out of greed quite a lot of individuals tend to cheat us by selling a synthetic gemstone claiming it to be the real natural one. This is because most of the times the person buying the stone is a layman & doesn't have adequate knowledge on the same....

**There are a couple of ways you could have an idea about this.**

1. The price of the stone increases with its transparency & as its color gets deeper & better. So if you see a person offering a gemstone with very deep & beautiful color with very high transparency for a very less price then you can think there could be something wrong.

2. You could visit a few merchants & get an idea of the price going on in the market.

3. you could always ask for an official lab certificate for the gemstone, quite a few vendors are issuing certificates on their own company's name & not from a laboratory such certificates do not hold an value & guarantee. This is very common for Rudraksha & gemstones.

4. Avoid buying from typical astrologers & jewelers; they are not an expert for the same; they are good with ornaments & making of the gemstones in rings & pendants. You could always from reputed gemstone merchants & gemologists.

5. We at Rudrablessings do issue a laboratory certificate if demanded by client from a reputed gem testing lab, also our CEO Mr. Rohan Advani is an official Gemologist from Mumbai university approved institute & a highly reputed gem therapist. Every gem coming in goes through his eye & further tested by laboratories. We also have our links directly with mine holders in the source country, so there no middlemen that we need to depend on. We insist our clients on buying non treated high quality gemstones. This assures you our authenticity & and assurance of high quality product at the lowest possible price.
